

STATE AEROSPACE & DEFENSE CORPORATION (HAL/SADC)

REQUEST FOR PROPOSAL (RFP)

Tender Title: Aerospace Precision Digitalization & Advanced Manufacturing Execution System (MES)

Reference Number: HAL/2026/AERO-MES-404

Estimated Project Value: INR 12.00 Crore (INR 120,000,000)

Bid Submission Deadline: 21 Days from Publication Date

Project Location: Heavy Aerospace Assembly & Defense Hangar

SECTION 1: DEFENSE & AEROSPACE MANDATORY ELIGIBILITY

1.1 Aerospace Operational History:

The Bidder MUST have at least 10 continuous years of operational experience strictly in Aerospace Manufacturing, Avionics L

1.2 Specialized Defense Domain:

General software vendors or commodity trading firms are strictly disqualified from bidding.

1.3 Security Clearance:

The Bidder must possess Secret-level facility security clearance issued by the Ministry of Defense.

SECTION 2: MANDATORY COMMERCIAL TURNOVER & AEROSPACE CERTIFICATIONS

2.1 Substantial Aerospace Turnover Requirement:

The Bidder MUST have an average annual audited turnover of NOT LESS THAN INR 25.00 Crore (INR 250,000,000) specific

2.2 Mandatory AS9100 Rev D Certification:

The Bidder MUST possess a valid and active AS9100 Rev D (Aerospace Quality Management System) certification. Standard

2.3 Environmental Certification:

Active ISO 14001 Environmental Management System certification is mandatory for all shopfloor robotics deployments.

SECTION 3: AEROSPACE CNC/PLC INTEGRATION & FLIGHT COMPONENT TRACEABILITY

3.1 Aerospace CNC/PLC Machine Interfacing:

The system must interface directly with 5-axis CNC titanium milling machinery and PLC controllers across the defense aircraft

3.2 Production Line Traceability & AS9102 First Article Inspection:

The MES platform must enforce AS9102 First Article Inspection workflows and full metallurgical batch lot traceability for turbine

3.3 ITAR & Military Standard Compliance:

All telemetry software must strictly comply with ITAR regulations, MIL-STD-883C environmental durability specs, and DO-178C

SECTION 4: KEY AEROSPACE STAFFING, RAPID SCHEDULE & SEVERE PENALTIES

4.1 Specialized Aerospace Avionics Bench:

The Bidder must assign a full-time Lead Avionics System Engineer possessing a Master degree in Aeronautical Engineering a

4.2 Rapid Prototype Schedule:

An operational on-premise hardware prototype interfacing with physical CNC machine cells must be fully commissioned within

4.3 Severe Liquidated Damages:

Milestone delays will attract liquidated damages of 2% per week of delay up to a maximum cap of 20% of total contract value.

4.4 High Value EMD Commitment:

Mandatory EMD deposit of INR 2,400,000 via irrevocable Bank Guarantee.
